OBJECTIVE

Software Engineer with 2+ years of experience in full-stack web development and strong expertise in MERN stack and Java development. Seeking a full-time web development role to contribute innovative solutions, collaborate with cross-functional teams, and continue advancing technical skills.

SKILLS

Programming Skills Java, C++, C, JavaScript, Python

Web Development MERN Stack (MongoDB, Express.js, React.js, Node.js)

Methodologies Agile, FDD (Feature-Driven Development), XP (Extreme Programming), Waterfall.

Tools Git, VS Code, Postman, Railway, Heroku, Vercel, Netlify.

Database MongoDB, MySQL, MS SQL.

Others RESTful APIs, Version Control, Unit Testing, Debugging, Responsive Design

EXPERIENCE

MERN Stack Developer (Remote)

Jan 2022 - Present

Freelance

- Developed and deployed multiple full-stack web applications, achieving a 20% increase in user engagement through improved functionality and UI design.
- Built and maintained web applications using Node.js, Express, and MongoDB, ensuring high performance

PROJECTS

[Link] Catstagram

Social Media Web App for Cats

- Developed a social media platform specifically for cats, allowing users to create profiles, save and like posts, and interact with others in a fun and engaging way.
- Used the MERN stack (MongoDB, Express, React, Node.js) to ensure seamless user experience and high scalability.

[Link] Usmaniagarden.com

Real Estate Web App

- Built a real estate website with a custom admin panel for managing property inquiries.
- Integrated a file management system for users to upload property documents securely.
- Admin Panel for tracking receipts which generated a QR code for customers to scan and view the progress of their files.
- Deployed the website too by buying domain from godaddy.com.

[Link] Unilever Website Remake

Website Development

- Remade the Unilever website with added functionality, including product displays, an admin panel, and features like add-to-cart and order processing.
- Improved user experience with order tracking and admins order processing.
- Technologies: Bootstrap, EJS, Express.js, Node.js, MongoDB

Rent a Car Management System

Java Application

- Designed and developed a Java-based desktop application to manage car rentals, including vehicle availability, admin management, role assignment, and client management.
- Technologies: Java, JavaFX for UI

Restaurant Management System

Python Application

- Developed a Python-based application in the First Semester for managing restaurant operations
- Technologies: Python, Tkinter for UI

EDUCATION

Bachelor of Software Engineering, COMSATS University Islamabad, Lahore Campus Current CGPA: 3.82/4.0 (After 4 semesters).

Expected 2027
